Sergei Baturin (Russia, Bashkortostan Republic, 453431)

Goal

Junior JavaScript developer - remotely

Stack - React / Redux / Node

Skills

JavaScript / React / Redux

Node (Express / Koa)

Webpack / Gulp / GIT

SQL

HTML / CSS / SASS

Education

Social teacher, 2002 - 2007

College of Blagoveshchensk

English level

Intermediate

Experience in IT 2018 - 2019

Since the end of 2017, I have written small websites for organizations in my city (Blagoveshchensk, RB). Here are some of them iblag.ru, blagdoctor.ru, mbugdk.ru, baimuratova.ru. In the role of full stack developer, I tried to reduce the budget of clients and paid great attention to the compliance of the product of those assignments.

JS, React, Redux & Node have been studying since the beginning of 2019. Programming so captured me that I decided to leave other activities. Here are serjbaturin.github.io links to all my test projects.

Additional information

I am interested in the study of algorithms and data structures in JavaScript and Python languages, as well as programming principles and paradigms
